

Chemical Hazard Statements

Samples references, compounds or other materials submitted to Analytical Answers, Inc. which are known or suspected safety or health hazards, must be accompanied by Material Safety Data Sheets (MSDS). For experimental samples MSDSs are required to be prepared and transmitted with the initial shipment of all hazardous chemicals by OSHA regulations. Therefore we cannot accept hazardous materials, as defined by OSHA under 29 CFR 1910.00 without an appropriate MSDS. Analytical Answers, Inc. reserves the rights to reject samples which we decide are too hazardous to handle in our facility.

About Analytical Answers, Inc.

Analytical Answers, Inc. is a consulting and laboratory services company located in Woburn, MA, providing spectroscopy, microanalysis, surface characterization and failure analysis. As a member of the American Council of Independent Laboratories we adhere to strict Code of Ethics that protects client information and confidentiality. With over 100 years of combined experience among our scientists and instrumentation capabilities usually only found in corporate or academic laboratories, Analytical Answers, Inc. can provide data and the expertise to translate that data into knowledge.
